Printed from: Interstate Technology & Regulatory Council (ITRC). 2023. *PFAS Technical and Regulatory Guidance Document and Fact Sheets* PFAS-1. Washington, D.C.: Interstate Technology & Regulatory Council, PFAS Team. https://pfas-1.itrcweb.org/.

Acknowledgments

The members of the Interstate Technology & Regulatory Council (ITRC) PFAS Team wish to acknowledge and thank the individuals, organizations, and agencies that contributed to this online document (from 2017 through 2025) that includes the PFAS Technical and Regulatory Guidance Document, the 2025 Priority Topics, Sorption-based Treatment Technologies Guidance, PFAS Fact Sheets, training resources, and external tables of data and information prepared by the ITRC PFAS Team.

The PFAS Team was led by: Bob Mueller, New Jersey Department of Environmental Protection (2017 – 2021); Ginny Yingling, Minnesota Department of Health (2017 – 2020); Kate Emma Schlosser, New Hampshire Department of Environmental Services (2020 – 2022); Sandra Goodrow, New Jersey Department of Environmental Protection (2020 – 2023); Kristi Herzer, Vermont Department of Environmental Conservation (2022 – 2025); Jeff Wenzel, Missouri Department of Health and Senior Services (2024 – 2025); and Ted Campbell, North Carolina Department of Environmental Quality (2024 – 2025).

The team leaders were assisted by Program Advisors: Lesley Hay Wilson and Jim Rocco of Sage Risk Solutions LLC. Josh Criss of GDIT provided video support for the training video modules. Tadbir Singh, ITRC/ECOS Project Associate; Evan Madden, ITRC Project Manager; Marguerite Bennett, ITRC Project Associate; and Sabrina Heivilin, ITRC Project Manager provided support to the team. Bobbilynne Koepke and Susan Cummins of Environmental Works, Inc. provided support for the collaborative PFAS and Vapor Intrusion Teams' Fact Sheet.

During the development and updating of the fact sheets, technical and regulatory guidance document, priority topics, sorption-based treatment technologies guidance, external tables, and training resources the team received many comments and reviews from experts across U.S. EPA, U.S. DoD, U.S. DOE, state agencies, academic institutions, industry, and consulting. This input was invaluable to the development of these ITRC products. The team greatly appreciates those who offered advice, suggestions, reviews, and comments.

Specifically, the team wishes to thank and recognize the efforts and important contributions of the team members.
