[\(clear\)](#)

- [sorption](#) Removal of a compound from solution by solid phase constituents. This term is often used when the mechanism of removal (adsorption, absorption, or precipitation) is unknown. (Thompson and Goyne 2012)
- [Stabilization](#) A process to reduce mobility of compounds in the environment through physical or chemical means.
- [Surfactant](#) A surface-active agent that lowers the surface tension of a liquid.
