

WATER MATRIX PARAMETERS OF INTEREST	PRE-TREATMENT TECHNOLOGIES	PFAS TREATMENT TECHNOLOGIES	POST-TREATMENT TECHNOLOGIES	WASTE GENERATED	WASTE DISPOSITION ALTERNATIVES
-------------------------------------	----------------------------	-----------------------------	-----------------------------	-----------------	--------------------------------

- TOC, COD
- TSS, TDS
- Salinity
- Biological activity
- Iron, manganese
- Other metals

- Filtration: multi-media, cartridge filter, bag filter
- Chemical addition
- Precipitation: aeration, flocculation
- Coagulation

- FIELD-IMPLEMENTED TECHNOLOGIES (12.2)**
- GAC Adsorption (12.2.1.1)
 - Ion Exchange (IX) Resin (12.2.1.2)
 - High-Pressure Membranes (12.2.2)
 - Foam Fractionation (12.2.3)

- FIELD-IMPLEMENTED TECHNOLOGIES**
- GAC or IX polishing (12.2.2.1, 12.2.1.2)

- Filter material, media, cartridges, bags
- Precipitates, Flocs

- CURRENT TECHNOLOGIES**
- Waste disposal (12.3.2)
 - Incineration, where permitted (12.4)
 - GAC reactivation, if allowed (12.2.1.1)

- VOCs

- Air stripping with vapor treatment
- Adsorptive media
- In situ pre-treatment technologies
- Advanced oxidation

- DEVELOPING TECHNOLOGIES (12.6)**
- Sorption Technologies (12.6.1)

- DEVELOPING TECHNOLOGIES**
- Sorption Technologies (12.6.1)

- GAC
- Sludge
- Liquid wastes
- PFAS containing remediation/solid wastes

- DEVELOPING TECHNOLOGIES**
- Redox manipulation (12.6.3)
 - Plasma (12.6.3.8)
 - Electrochemical Treatment (12.6.3.6)
 - Sonochemical Oxidation (12.6.3.4)

- SVOCs
- TPH-GRO and DRO(C6- C28)
- 1,4-dioxane
- Pesticides, Herbicides

- Adsorptive media
- In situ pre-treatment technologies
- Advanced oxidation
